WHY ECORAD?

**For homeowners necessitating
a new heating installation or
restoration of their radiators**

- SAVINGS IN ENERGY COSTS
- FLEXIBLE CONTROL WITH THERMOSTATS
- HEALTHIER THAN CONVECTION HEATING

ecorad.ca

NEW SYSTEM

ECORAD has an extensive inventory, from the simplest design to elaborate ornamental pieces, dating back to 1850.

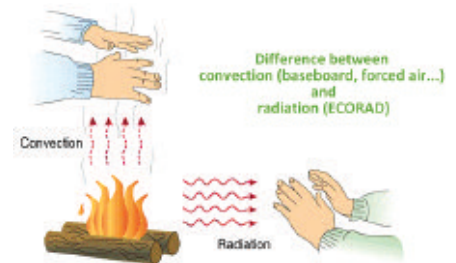

INSTALLATION

As simple as an electric baseboard heater to install. A specially manufactured electrical insert replaces the extensive water piping system needed for a central boiler. The radiators are controlled by **electronic thermostats**.

CONVERTING YOUR RADIATORS

An existing hot water or steam radiator system can be converted into an electric radiators system. **Conversion includes:** Inspection, stripping of the old paint, cleaning the inside, water and anti-freeze mix, standard finish and size adjustment.

Main advantages of ECORAD system over main alternatives

Advantage of ECORAD on:	Heating oil, Central System	Forced Air (Electric base-board and convector)	Natural Gas, Central System	Radiant Floor (all energy sources)
Cost saving (Québec)	20%-45% ¹	20%-35%	10%-20%	13%-20%
Energy saving	15%-35% ¹	20%-35%	15%-30%	13%-20%
Environment	Large reduction of CO ₂ e emissions ¹	Radiators are of an existing material and recoverable	Large reduction of CO ₂ e emissions	Radiators are of an existing material and recoverable
Health	Removal of the old lead paint and pollutant	Decrease the spread of microbes	Removal of the old lead paint and pollutant	Very low exposure to electromagnetic fields (vs. electric radiant)
Comfort	Flexible control of room temperature	Removing the effects of airflow and dry air	Flexible control of room temperature	No discomfort and undesirable sensation, when heat is high
Aesthetic	No more piping and boiler and gain of space	Decorative element versus ducting	No more piping and boiler and gain of space	Possibility of renovation without damaging the heating system

¹ According to the report by the independent engineering firm Econoler on energy savings assessment, April 2013. For the Program (PAIE) of Québec natural resources

SERVICES OFFERED:

- Sales of radiators for central water / steam systems
- Sales of electrified radiators
- Restoration and size adjustment of radiators
- Electrification service

Before/After

- Purchase of radiators
- Handling and transportation by specialists

SPECIFICATIONS

All voltages

Units between 250 and 5000 Watts

10 year limited warranty

CSA certification
